

Laboratory Technician Position at The College of William and Mary

The High Energy Physics group at The College of William and Mary in Williamsburg, VA is looking to hire two full-time laboratory technicians. The successful candidates will have a role in the daily operation of the lab including procedure development, experiment preparation, ordering supplies, and supervision of undergraduate laboratory research assistants. They will also have a significant role in the construction of the active detector elements for the MINERVA neutrino detector, which are being assembled on the William and Mary campus.

Candidates must be reliable, responsible, and must have careful attention to detail. Position requirements also include basic computer literacy (including email, spreadsheets, and word processing). No prior physics experience is required.

Desirable qualifications include machine shop or mechanical assembly experience, a bachelor's or higher degree in the physical sciences, or relevant research experience. Salary is \$25-40k depending on experience and the position includes full health and retirement benefits. We anticipate the funding for this position for at least two and a half years. It is possible the position may be extended and additional opportunities may become available. Interested candidates should contact Dr. Jeff Nelson by email at jknels@wm.edu. Information about this lab and Prof. Nelson's research may be found at <http://www-hep.physics.wm.edu/~jkn/>. William and Mary is an equal opportunity employer.
